

# The Value of Sustainability: ASSA ABLOY Wholesale Partners

## Greening the Building Materials Industry

You've been hearing about sustainability, LEED, and maybe even Living Building Challenge. What do these terms mean to you and your business? What do these terms mean to your general contractors and users? How can you rely on innovative manufacturers to help you become experts in this area? We want to help you become the go-to partner for your customers when it comes to sustainability.

## Reduce, Improve, Enhance

Look to ASSA ABLOY Door Security Solutions for all of your doorway-related sustainable building challenges- from energy efficient openings that improve building envelope thermal performance, to products produced with rapidly renewable materials and recycled content.

## Sustainable Door Opening Solutions

As your campus strives to meet sustainability goals, every aspect of a building becomes crucial. We have done our homework, so whether your project is working toward LEED, Living Building Challenge, or even net zero, there is an ASSA ABLOY solution that can help contribute.

### Improve Energy Efficiency and Building Envelope Performance

- Insulated energy efficient doors
- Thermal efficient frames
- Gasketing (Weather-stripping)
- Door closers and energy efficient operators

### Sound Transmission Control Solutions

- Sound rated doors, frames and accessories
- Economical and durable noise reduction solution
- Available in wood, aluminum hollow metal, and stainless steel

### Specialty Opening Solutions

- Storm tested resilient openings (windstorm/tornado)

## Sustainable Access Control Solutions

When evaluating electronic access control solutions, it is important to understand the energy usage difference between products. ASSA ABLOY IP-based solutions lessen power requirements and material infrastructure.

- Integrated PoE (Power over Ethernet) draws up to 76% less power in standby mode than traditional access control installations as certified by GreenCircle
- WiFi access control solutions leverage current 802.11 WiFi infrastructure, offering the same reduction of components as PoE, and optimizing power consumption for long battery life
- EcoFlex™ electrified mortise locks reduce energy consumption up to 96% compared to standard electrified mortise locks as certified by GreenCircle
- EcoPower™ is a highly efficient and full-featured access control power supply that reduces standby power consumption by over 99% compared to current generation access control switching power supplies

## Value Added Services

- LEED submittal form support
- Design and consulting
- Specification writing
- BIM Services – ASSA ABLOY Openings Studio Manager
- “Try Me” sample program
- Mobile innovation showrooms
- Exclusive factory site tours
- Code compliance guidance
- Site surveys
- Technical product support
- Follow-up installation support
- ASSA ABLOY Americas University educational portal
