Free to Move, Safe to Learn

## Flexible, reliable security solutions for education

Education is for life, and schools are for living. Corbin Russwin's Grade 1 classroom security systems offer the ease of everyday access while keeping unauthorized individuals out. You never have to choose between safety and style with our bored and mortise locks for interior doors and our full line of exit devices. For ultimate security, teachers can even lock the door from inside the classroom using an RF fob. Designed for schools, secured for safety, we created our locking solutions with the education community in mind.
